Details of the Side Events in Europe

The aim of Side Events is to reach a wider audience by connecting science with social topics, as a way to inspire and involve civil society.

ART

What
Art of change 21

Who
The association Art of change 21

Where
Paris, France

When
July 11th, 2015

Format
A workshop "art-science", including a debate and creative activities

In brief
«The association Art of Change 21 implements for COP21 some creative and collaborative actions that aim at mobilizing citizens for COP21, allowing them to become stakeholders. During this workshop organized with artists and scientists, participants create an eco-designed mask to symbolize their own concern about the climate change effects on health and nature, and a mobile application offering to the users ideas to adopt a Carbon-free living.»

CITIES

What
Ephemeral botanical urban landscape: A performative method towards resilience and adaptable public spaces

Who
Botanical City Inc, (USA) and The Maracaibo's Botanical Garden Foundation (Venezuela)

Where
Place Jussieu, Paris, France and Maracaibo's Botanical Garden, Zulia, Venezuela

When
July 8th, 2015

Format
2 workshops – Paris/Venezuela (simultaneously scheduled)

In brief
«Botanical gardens are institutions especially prepared to lead the discussion on climate change adaptation strategies as well as mitigation actions at the territorial, metropolitan and local scales. During these two outdoor experiences, participants are invited to draw their botanical urban landscape and discuss their visions. It aims at encouraging the nature/culture conversation, and reflecting on public space adaptation to climate change, taking the botanical garden landscape typology as the point of departure.»

HEALTH

What
Impact of climate changes on Arctic Indigenous people's health and wellbeing a EU-Canada roundtable

Who
CNRS on behalf of the ERA-Can+ project

Where
CNRS Headquarters, Paris, France

When
July 6th, 2015

Format
Roundtable

In brief
«The rapid changes occurring in the Arctic Region clearly influence global climate and have large scale consequences on Arctic indigenous people. ERA-Can+ promotes cooperation between the European Union and Canada in science and technology, including the promotion of EU-Canada policy dialogue on Arctic research and cooperation. This side event will discuss challenges, opportunities and follow-up actions regarding 3 topics:
• impacts of climate change on health
• environmental contaminants
• mental wellness/suicide prevention.»
